

## High Performance Flush Fitting Window

Our high performance flush fitting window is our most popular product. Developed to offer the highest quality and performance whilst remaining a competitively priced choice.

The flush appearance lends itself equally to both modern and traditional installations.

## Sliding Sash Window

Our sliding sash windows are offered in two variants either traditional weight and pulley box sash or the more popular Spiral balance option utilising a much smaller sectional size more suited to new build.

## Storm Proof Casement Window

The Douglas & Peters storm proof window utilises a slightly smaller frame section. The standard friction hinge for side hung opening lights offers both egress and easy clean facility. Double cam locking espagnolette also comes as standard on all our casement windows.

## Timber Door Sets

At Douglas & Peters bespoke comes naturally. Every door set is manufactured to the customers individual requirements.

Glazing apertures, grooved designs, glazing options, single or dual coloured, contrasting door and frame colours, the choice really is yours, let your imagination run wild.

## French Door Sets

All our French door blades are manufactured using Accoya® to eliminate any swelling/seasonal movement associated with multiple door leaves.

## Bi-Folding Door Sets

As with our French doors all our bi-folding door blades are manufactured using Accoya® to eliminate any swelling / seasonal movement associated with multiple door leaves.

## Bespoke

At Douglas & Peters Bespoke comes naturally. Beautifully Arched, Circular, Gothic, or shaped windows and doors are lovingly hand crafted to your exacting requirements.

Contact our sales team for further information.

Accoya® wood is the result of decades of research and development that has brought together a long established and extensively proven wood modification technique, acetylation and leading edge patented technology to create a high performance wood, ideal for outdoor use and challenging applications.

Accoya® wood has properties that match or exceed those of the best tropical hardwood yet is manufactured from sustainable sourced wood.

Accoya® wood is naturally insulating and is more durable than other woods. This means windows do not swell when closed, doors continually open and close freely and maintain their natural beauty. Accoya® wood may be opaque or translucent coated and it's lower maintenance requirements increase it's cost effectiveness.

### Outstanding Durability

Accoya® wood's durability (rot resistance) is Class 1, matching and even exceeding the performance of nature's most durable woods such as Oak, Teak, Iroko and Sapele. Every batch of Accoya® wood is tested after production to ensure that it's durability can be guaranteed.

### Dimensionally Stable

Accoya® wood's superior dimensional stability (resistance to swelling and shrinkage) exceeds all commonly used species, including Teak, Sapele and Iroko. Accoya® wood has been tested over prolonged periods in all types of weathering conditions—above ground, below ground and even in water—and has been proven to withstand even the toughest of environments.

### Ideal For Coating

Accoya® wood has shown improved coating lifetime performance with many types of coatings, resulting in extended maintenance intervals. The light colour of Accoya® wood allows for a wide range of colour finishes. Improved stability means film-forming coating systems last up to two times longer.

### Sustainable Choice

By significantly enhancing the durability and dimensional stability of fast growing, abundantly available certified wood species, Accoya® wood provides compelling environmental advantages over scarce slow growing hardwoods, woods treated with toxic chemicals, and nonrenewable carbon-intensive materials such as plastics, steel and concrete.

Our ironmongery is available in Satin Chrome, Polished Chrome, Polished Gold, Black or White.

# Warranty & Guarantees

- 30 years warranty against fungal and rot on all external joinery components.
- 10 years warranty on all factory finished windows and door sets against manufacturing defects.
- Upto 10 years warranty on all opaque factory finished items against flaking, cracking, blistering or erosion subject to exposure level and paint colour.
- Upto 5 years warranty on all translucent factory finished items against flaking, cracking, blistering or erosion subject to exposure level and stain colour.
- 5 years warranty on furniture, locking mechanisms, and ancillary factory fitted furniture on windows and doors against manufacturing defects.
- When maintained in accordance with general good practice guidelines.
